

Report: act_report

Insights and Visualization that I got from the Data Wrangling is:

For analysis, create a copy of the cleaned twitter archive data

Analysis 1: Analysis of rating of dogs

Insight:

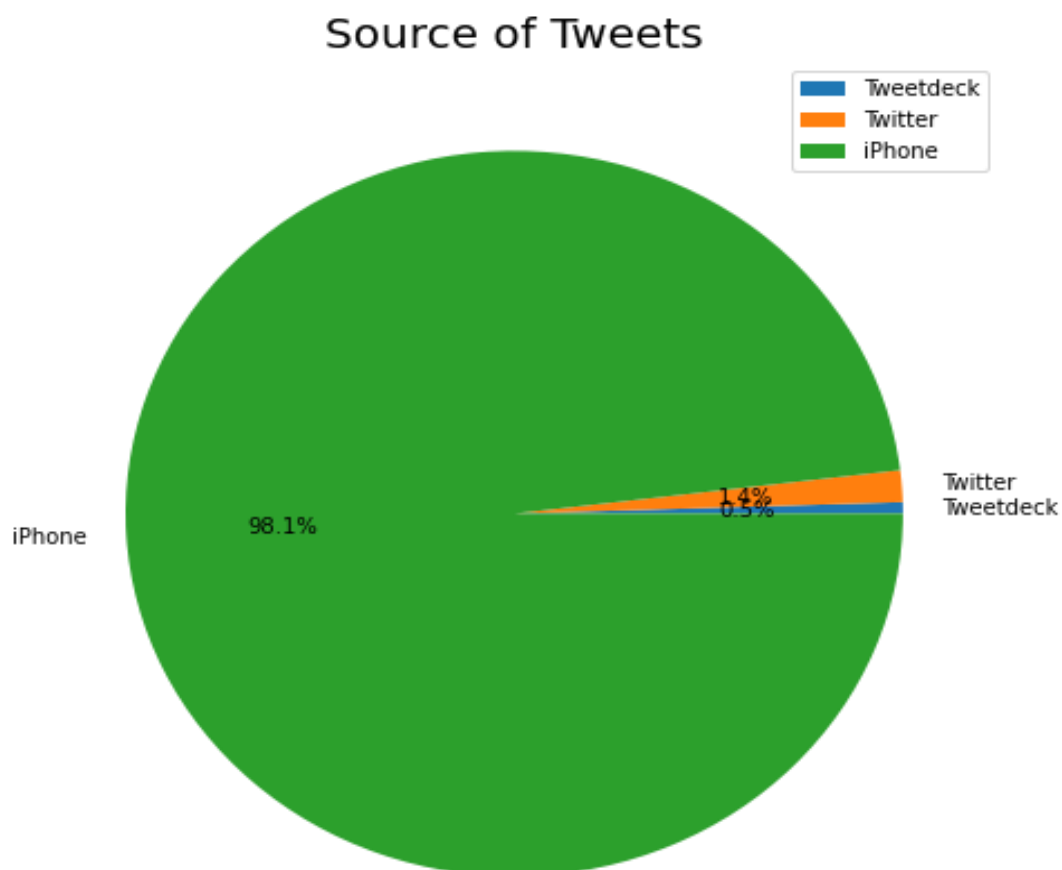

Out of a total of 1994 dogs rated by WeRateDogs, a total of 1154 dogs were rated above 10, which is almost 60% (excluding the ratings of 420 and 1776 which are outliers)

Analysis 2: Most used Twitter source

Insight:

WeRateDogs has posted 98% of the tweets from iPhone.

Visualization : Pie chart is best to demonstrate % of each sources.

Analysis 3: Analysis of famous Dog's Names

Insight:

Charlie, Cooper and Oliver are most popular Dog names.

Visualisation: Bar Graph is best to check the highest number of names of Dogs that people use
